---

## Professional Summary

Frontend Developer specialized in React, JavaScript, and TypeScript, with 3+ years in software development and 2 in digital banking. At Banco Azteca I build Deposits and Investments modules on a microfrontend architecture (Single-SPA), focused on performance and quality: ~30% faster load times through code splitting and lazy loading, and 97% test coverage with Jest and React Testing Library in CI/CD pipelines with SonarQube. Experienced in secure REST API consumption (JWT, RSA-OAEP), with a fullstack background in Node.js, .NET, and Django.

---

## Technical Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+), Redux, Next.js, React Native, HTML5, CSS3, SASS, Tailwind CSS
- **Architecture:** Microfrontends (Single-SPA, SystemJS), RxJS, REST APIs, JWT, code splitting, lazy loading
- **Testing & Quality:** Jest, React Testing Library, SonarQube, Clean Code, SOLID
- **DevOps & Tools:** Git, CI/CD, Docker, Rancher, Harbor, Postman, Jira
- **Backend, Data & Cloud:** Node.js, .NET (C#), Django, SQL Server, PostgreSQL, MongoDB, Firebase, AWS (Lambda, API Gateway, DynamoDB, Cognito)

---

## Professional Experience

### Banco Azteca — React Frontend Developer

Dec. 2024 – Present

- Build Deposits and Investments modules in React, JavaScript, and TypeScript within a microfrontend architecture (Single-SPA and SystemJS) with on-demand loading, using RxJS for cross-microfrontend communication.
- Integrated REST API consumption across 62 service modules, with JWT authentication and RSA-OAEP encryption to protect financial data in transit.
- Maintain 97.5% line coverage and 88% branch coverage in Jest and React Testing Library suites, meeting SonarQube quality gates in the CI/CD pipeline.
- Reduced load times and bundle size by ~30% through code splitting and lazy loading.

### Mexicode — Fullstack Web Developer

Oct. 2023 – Sep. 2024

- Built websites and web applications with React, JavaScript, WordPress, and CSS3, integrating REST APIs and relational databases based on each project's requirements.
- Led the development of an attendance management system with C#, .NET, Windows Forms, LINQ, and SQL Server: authentication, clock-in/clock-out, statuses, and date-range reporting.
- Performed code reviews and managed pull requests to uphold the team's coding standards.

### Holding HSI — Software Developer (IT)

Feb. 2023 – Oct. 2023

- Developed internal applications with Django and SQL Server (enterprise core and end-to-end warranty management), improving operational efficiency by ~40%.
- Optimized SQL queries and business logic to reduce response and processing times.
- Produced technical documentation and trained users on corporate tools.

---

## Education

### B.S. in Computer Systems Engineering

Jul. 2021 – Apr. 2025

Universidad de Ciencias y Administración, Mexico City

---

## Certifications

- AWS Serverless Demonstrated — Amazon Web Services (Sep. 2026) | [Verify credential](#)

---

## Courses

- React Native Expo: Applications for iOS and Android (2025)
- Cursor with Python: AI-Assisted Development (2025)
- React PRO: Take Your Fundamentals to the Next Level (2024)

---

## Languages

- Spanish: native | English: B2 — technical communication and documentation reading
